# K-Shock    T4/T8

# KTV Intelligent Controller

K-Shock T4/T8 KTV intelligent controller is the solution of KYSTAR for entertainment application scenarios such as KTV, party rooms and bars.
A comprehensive controller launched. It can intelligently identify the currently playing music, and automatically turn lights, music and video
Conduct unified scheduling on the face to create an immersive atmosphere.

声光电一体化：Integration of sound, light and video
VOD 曲目联动：VOD track linkage
云端素材更新：Cloud material update
免测试音频智能识别：Test-free audio intelligent recognition
微信弹幕联动：Wechat barrage linkage
网络直播上屏：On-screen webcast
兼容墙板控制：Compatible with wall plate controls
集成 LED 发送：Integrated LED send

## Integration of sound, light and video

K-Shock T4/T8 can intelligently associate sound, light and video, and as an intelligent master control, it can automatically coordinate various devices to complete field integration work.

K-Shock T4/T8实现声光视智能联控

打碟机：Disc player
点歌机：VOD
控制面板：control Panel
灯光控制器：Light Controller
LED 屏控制器：LED screen controller
音响功放：Audio amplifier
灯光：light
LED 显示屏：LED display
音箱：Speakers
实现声光视智能联控：Realize intelligent joint control of sound, light and video

## VOD track linkage

K-Shock T4/T8 is compatible with KTV song ordering systems of major mainstream manufacturers on the market.

It can automatically associate different scenes according to the track, and adjust the lighting and screen playback accordingly.

点歌机：VOD
曲目选择：Track selection
自动关联：Automatic association
灯光：light
视频：video
爱情，海洋，森林，黄昏...：Love, ocean, forest, dusk...

## Cloud material update

K-Shock T4/T8 can build a large amount of light and shadow materials without external video signals
Open various scenes, and users can update materials at any time through the Internet to keep up with the trend.

互联网：Internet
云端素材库：Cloud material library

## Test-free audio intelligent recognition

Without complex debugging, K-Shock T4/T8 can intelligently analyze the currently connected audio signal,
Real-time adjustment of lighting, video effects and intelligent VJ according to the rhythm of the music.

灯光、视频随打碟音乐律动自动改变

打碟机：Disc player
灯光视频随打碟音乐律动自动改变：The light video changes automatically with the rhythm of the disc player
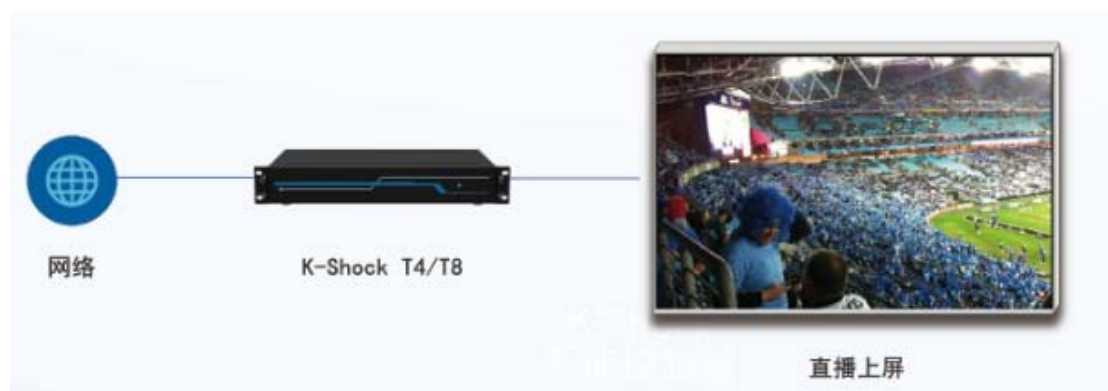

## Wechat barrage linkage

Users can scan through WeChat, switch materials, send barrage and pictures, and display them on the on-site display screen to achieve atmospheric interaction.

智能控制器：Smart Controller

## On-screen webcast

K-Shock T4/T8 supports RSTP, RMTP network live streaming, matching corresponding equipment to watch live network content such as football games, TV and live shows.

网络：Internet
直播上屏：live streaming on screen

## Compatible with wall plate controls

The device reserves a wallboard control port, which is convenient for users to connect to the wallboard controller and quickly switch working mode.

墙板控制端口

墙板控制端口：wallboard control port

## Integrated LED send

K-Shock T4/T8 integrates LED sending controllers, which can be directly connected to all Kystar LED receiving card products. The T4 supports 2.35 million pixels, and the T8 supports 4.7 million pixels.

集成LED发送

K-Shock T4/T8集成LED发送控制器，可直接对接凯视达全系LED接收卡产品，
T4单机支持235万像素，T8单机支持470万像素。

T4最大带载235万像素LED显示屏

T8最大带载470万像素LED显示屏

## Specifications

| 型号 | 视频输入 | 网口 | 存储空间 | 音频输入 | 控制端口 |
|---|---|---|---|---|---|
| K-Shock T4 | HDMI×1 | LAN×4 | 64 GB | 3路可切换 | DMX521、RS232/485、千兆网口 |
| K-Shock T8 | HDMI×1 | LAN×8 | 64 GB | 3路可切换 | DMX521、RS232/485、千兆网口 |

型号：Model
视频输入：Video input
网口：Network port
存储空间：Storage space
音频输入：Audio input
控制端口：Control port
3 路可切换：3-way switchable
千兆网口：Gigabit network port
